Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. *Claims 1-18* drawn to a system/method for resource matching, classified in class *705/37*.
 - II. *Claims 19-48* drawn to a system/method of optimizing resource allocation performance, classified in class *705/36*.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP ' 806.05(c)). In the instant case, the combination as claimed does not require the particular of the subcombination as claimed because the system/method of resource allocation/matching does not require the steps of global performance measures. The subcombination has separate utility such as portfolio selection, planning and analysis.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2143

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
